AMENDMENTS TO THE CLAIMS

Please cancel claims 12-13 and 15-29 without prejudice or disclaimer of their underlying subject matter.

1-29. (Canceled)

Please add the following new claims.

30. (New) An optical system having an optical module, the optical module comprising:

an optical element including a light receiving portion, said light receiving portion being between a shielding layer and a lens;

an optical filter between said lens and a diaphragm portion of a lens barrel, an opening through said diaphragm portion exposing said optical filter;

a plate between said lens barrel and a wiring board, said wiring board being between said optical element and said plate,

wherein said plate is of a first material, said wiring board being of a material other than said first material,

wherein said light receiving portion and said lens are disposed along an optical axis,

wherein a through-hole extends through said lens barrel, said plate, and said wiring board,

wherein said optical axis extends through said opening, said optical filter, and said through-hole.

DC288808 2

31. (New) The optical system of claim 3	0, wherein said optical	filter and said le	ns are
moveable in a direction along said optical axis.			

- 32. (New) The optical system of claim 30, wherein said optical filter is an infrared cutting filter.
- 33. (New) The optical system of claim 30, wherein said lens barrel is in an inner periphery of a holder, said plate being between said holder and said wiring board.
- 34. (New) The optical system of claim 33, wherein said lens barrel contacts said holder.
- 35. (New) The optical system of claim 30, wherein said diaphragm portion contacts said optical filter.
 - 36. (New) The optical system of claim 30, wherein said lens barrel contacts said lens.
- 37. (New) The optical system of claim 30, wherein said lens barrel contacts said plate.

	38. (New) The optical system of claim 30, wherein said plate contacts said wiring
board.	

- 39. (New) The optical system of claim 30, wherein bumps electrically connect said wiring board with said optical element.
 - 40. (New) The optical system of claim 30, wherein said first material is a metal.
- 41. (New) The optical system of claim 30, wherein the shielding layer is a metal layer.
- 42. (New) The optical system of claim 30, wherein said shielding layer is a resin layer.
- 43. (New) The optical system of claim 42, wherein a portion of said resin layer is in contact with said wiring board.
 - 44. (New) An imaging device comprising:

the optical system according to claim 30.

Docket No.: SON-1894

45. (New) A camera system using a camera module comprising:

the optical system according to claim 30.
